Pascal Schmid – Blockchain Expert with financial background

Planning + implementation = success: I am an active person who systematically plans and implements. I value positive stress, remain realistic and I am proud of my success.

Individual + team = common goals: I have high expectations of myself and others. I actively participate in an environment of team players where the performance of the individual counts and positive feedback is given.

Responsibility = Trust: I then achieve my best performance, when I assume responsibility and receive trust.
